

Statement supporting reasons for requesting a General Meeting of Friends of The Pinnacle

This meeting is for members to learn about, discuss and have input to an environmental offset at North Kama. The offset area, to be incorporated into the Pinnacle Nature Reserve, follows the loss of low quality box gum woodland at the new University of Canberra Public Hospital.

The adequacy of the offset and proposals for its management present an extraordinary opportunity for better conservation outcomes at the Pinnacle – a topic of interest to all members. The proposed meeting gives members the chance to guide and support the Coordinating Committee's efforts to maximise outcomes for the Pinnacle.
